Mohammad Hosein Behzadifard

About Me

.NET Backend Developer with an M.Sc. from Politecnico di Milano and 3+ years of hands-on experience in C#/.NET backend development. Skilled in building RESTful APIs and clean, maintainable code within Agile/Scrum teams. Currently expanding into Angular, TypeScript, and unit/integration testing to strengthen full-stack and quality-assurance capabilities. Available immediately, open to relocation, no visa sponsorship required.

Skills

Programming: C#, Python, JavaScript, TypeScript, SQL

Frameworks and Libraries: .Net Core API, .Net Core MVC, .Net Core Razor Pages, .Net Framework MVC, WinForms, Jquery

Tools & Technologies: Git, GitHub, TFS, Docker, Ubuntu Server, Windows Server, SQL Server, PostgreSQL, MongoDB, RESTful API, GitHub Actions, Azure DevOps, Jira

Soft Skills: Knowledge sharing, Ownership, Adaptability, Stakeholder alignment

Languages

English (C1, IELTS),Dutch (Currently learning), Persian (Native)

Certifications

C# Programming | *South Industrial Management Institute | 2018*
Python Programming *| South Industrial Management Institute | 2019*
Desktop Application Development *| South Industrial Management Institute | 2019*
Web Development with ASP.NET *| South Industrial Management Institute | 2020*

Education

- **Master of Computer Science And Engineering** 2022-2026

Politecnico di Milano, Milan, Italy

Selected for the Erasmus+ program in Leipzig, Germany.
Graduated with a 90/110.
Thesis: "MLOps and Kubeflow: Engineering Challenges and Support for AI Component Integration", Designed and implemented an end-to-end Machine Learning and MLOps pipeline using **Kubernetes**, **Docker**, and **Kubeflow**. Integrated a Flask-based API and automated the deployment process via CI/CD for seamless model lifecycle management.

- **Bachelor of Computer Science And Software Engineering** 2017-2021

Zand University, Shiraz, Iran

Twice awarded for leadership in startup competitions.
Graduated with a high GPA of **18.72/20**.
Thesis: developed an SEO-optimized, multi-language CMS using ASP.NET Core 3.1.

Experience

Backend Developer *Ably* 2019-2022

- **Deployed** and **maintained** production services across **Windows and Ubuntu servers** over a **12-month period**.
- Utilized **Docker, Azure DevOps and CI/CD pipelines** to automate deployment workflows, **reducing deployment** time **by 60%**.
- **Optimized MSSQL bulk-insert** performance by temporarily **disabling nonclustered indexes** during large loads and rebuilding them afterward, **improving import throughput by ~45%**.
- **Implemented backend features** for a payment reconciliation module, aligned automated tests with **QA**, and reduced release regression failures by **30%**.
- Collaborated with **product, test managers, senior developers,** and **customers** to define **API contracts** and **MSSQL schemas**, delivered **migrations** and reduced **data incidents** by **40%**.
- Participated in **code reviews** with senior developers, improving code quality and maintainability; **mentored and taught six interns** during their placements.

Software Engineer Internship *Ably* 2018-2019

- Built clean, scalable code with C# and .NET Core, applying OOP and best practices such as SOLID, DRY, KISS, and YAGNI.
- Delivered 3 WinForms modules for internal tooling, reducing manual processing time by ~25% for the support team.
- Developed REST APIs and web applications using MVC and Razor Pages.
- Gained hands-on experience with JavaScript, HTML, CSS, Bootstrap, and jQuery.
- Prepared and organized documents to support project tasks.
- Familiar with software architecture and design patterns through hands-on work.

Projects

Merchant Onboarding Platform (FinTech/POS):
Built merchant onboarding platform integrating OCR to auto-populate forms, cutting manual entry time by 70% and increasing onboarding throughput by 2.5x.
Fleet Tracking System:
Contributed to a GPS-based fleet tracking platform that improved monitoring of vehicle activity and helped reduce idle-time losses for hourly-paid drivers.
Treasury & Loan Management Platform:
Developed backend modules for auditing income and expenditure records and calculating loan interest within an internal banking platform.
B2B Marketplace Systems:
Delivered marketplace features that supported 500+ seller listings and automated service lifecycle notifications, decreasing time-to-response for service tickets by 30%.
Web Platforms:
Built multiple e-commerce sites, CMS platforms, and LMS systems using ASP.NET Core, focused on performance and multi-language support.

Professional Development

Applying xUnit and Testcontainers to improve test coverage, integration reliability, and release confidence throughout the development lifecycle.
Building stronger full-stack capabilities with Angular 17 and TypeScript to deliver responsive, maintainable, component-based user interfaces.
